

TECHNICAL DATA SHEET

**LIQUID DISINFECTANT READY FOR USE FOR
PRE-MILKING DAIRY CATTLE NIPPLES.
PROFESSIONAL USE
Medical Surgical Product – Reg. Health
ministry no. 20252**

Characteristics:

PREMAM PL1 is a bactericide disinfectant ready for use that falls into the category of biocides for veterinary hygiene. PREMAM PL1 is designed for cutaneous hygiene of dairy cattle udders and disinfecting the nipples, to be applied before milking operations so as to prevent mastitis from occurring and for good nipple hygiene practice. The antibacterial qualities of PREMAM PL1 promote high nipple hygiene before milking, clearing it from residual impurities and ensuring a constant bactericide barrier for the entire duration of the milking while providing a suitable defence against mastitis.

Physical and chemical properties:

Physical Appearance	Clear liquid
Colour	Colourless
Odour	Typical
Ph (as it is)	Approx. 2
Specific weight (at 20°C):	1.06 gr/ml
Components	Lactic acid, Hydrogen peroxide, Anionic and non-ionic surfactants, Glycerine.

Instructions and methods of use:

to achieve the best results, proceed as follows:

- Pour PREMAM PL1 into the applicator cup, creating the active foam, apply before milking by dipping the nipple into the bactericide solution;
- Keep the foam in contact with the nipple for at least 30 seconds, then before attaching the milking unit dry the product by using disposable paper or disposable tissue;
- Renew the bactericide liquid whenever contamination occurs;
- Check that any post-dipping treatment residues have been removed from the washing;
- Clean the equipment used for the application by using hot water.

TECHNICAL DATA SHEET

A correct and constant use of PREMAM PL1 reduces the bacterial load before milking, thoroughly cleans the skin and arranges for a healthy milking. The emollient and soothing properties of the formula provide additional benefit to assure the animal's well-being.

Storage: the product is vulnerable to the cold: store at temperatures between 5°C and 30°C. If properly stored in original containers, the product will keep its characteristics unchanged for 12 months.

WARNINGS: External use. After handling and in the event of contamination, wash thoroughly using soap and water.

USERS OF THE PRODUCT ARE RESPONSIBLE FOR ANY DAMAGE ARISING FROM MISUSE OF THE PREPARATION – DO NOT SELL UNPACKED – DO NOT REUSE THE CONTAINER – THE FULLY DRAINED CONTAINER MUST NOT BE DISPERSED IN THE ENVIRONMENT.
